

Alan

An open-source eye, ear and skin learning tool

Thirty-three words. One clear plan.

Alan is deliberately authored.

Concise replies, stepwise guidance and a focus on care in low-resource settings.

What Alan is

An AI learning tool for eye, ear and skin care, designed for low- and middle-income countries and useful everywhere.

Pairs with the low-cost Arclight ophthalmoscope, otoscope and dermatoscope.

Why it exists

Expertise is scarce

Training is limited

Affordable tools are lacking

Immediate help is often unavailable.

Five core features

Expert

Informed by specialist review

Efficient

Ultra-concise replies

Easy to use

Stepwise interaction

Explainable

Open, readable instructions

Encouraging

Supportive tone

Five logic steps
